

SIMPLERIX data*check

Simply Check Data Consistency Across Your Systems

SIMPLERIX data*check is a specialized add-on for semi-automatically checking the data consistency across your different systems. The solution executes a structured and complete comparison of tabular master and movement data, making hidden inconsistencies immediately transparent.

The flexible solution supports any tabular data sources::

- > **System integrationen**, e.g. SAP HCM (On-Premise) and SAP SuccessFactors (Cloud)
- > **Data migration** between SAP HCM Payroll and UKA solutions
- > **Comparison of actual and target data**, e.g. following system changes or reorganizations in HR
- > **Comparison of process results**, e.g. payroll runs or time recording results
- > **Validation of exports and reports**, e.g. comparison of BI or Excel reports with the source system

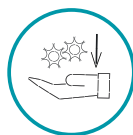

SIMPLERIX data*check offers you:

- > **Comprehensive data comparison:** Automatic loading and comparison of all relevant export data at the touch of a button
- > **Flexible matching:** Definition of individual comparison criteria, and column and value mapping
- > **Immediate recognition of deviations:** Missing or deviating data records are highlighted
- > **Local execution for maximum data security:** Processing of HR data without external transmission of data

With SIMPLERIX data*check you gain:

Significantly accelerated data migration

Massively reduced manual outlay

Complete data transparency

Improved data quality
