SIMPLE RECRUITING IN SAP SUCCESSFACTORS

How to receive more qualified applications. Without a major project or system change.

SAP SuccessFactors offers a strong foundation for your recruiting. However, the standard process usually requires applicants to create an account, set a password, and click through multiple steps. This takes time, and, especially in high-demand roles such as IT, engineering, or management, every hurdle hurts twice: **it increases time-to-hire, reduces conversion, and leads to frustration on both sides**.

Professionals and leaders have **neither the time nor the patience** for:

> Mandatory registration with password
> Long forms
> Complicated processes

The result:
No applications – even with strong job postings and employer branding.

THE SOLUTION

SIMPLERIX quick*apply

More qualified applications directly in your SAP SuccessFactors.

SIMPLERIX quick*apply is a simple application that elevates your existing SAP SuccessFactors recruiting process to the next level – without a system change and without intermediate data storage. With SIMPLERIX quick*apply, you enable candidates to submit a **fast, simple, and mobile application with just a few clicks** directly in the job posting.

Your advantages at a glance

✓ Application directly in the job posting

✓ No login, no password

✓ CV parsing

With SIMPLERIX quick*apply

Gain **suitable candidates faster** and deliver results that the business needs.

Reduce drop-offs, improve time-to-hire, and increase funnel quality.

Receive a solution that is seamlessly integrated, secure, and low maintenance.
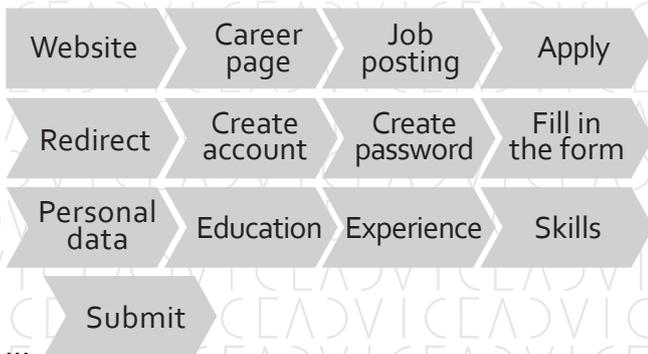

WHAT OUR CUSTOMERS SAY:

*With SIMPLERIX quick*apply candidates can apply in under a minute – simply with their email address and CV. No account, no password, no mandatory cover letter. Thanks to CV parsing, duplicate data entry is eliminated as well. For us, this is a clear advantage over other solutions that require time-consuming registration – and a real plus for the candidate experience.*
